

Graduate Programs

Educating responsible leaders for tomorrow's world

The world needs professionals with an understanding in sustainability and leadership. Sustainability Management School (SUMAS) provides a wide range of business degrees with a sustainable edge in finance, fashion, hospitality, tourism and management.

A SUMAS degree increases your chances to find an exciting and innovative global professional opportunity. So why not to be prepared to become an inspiring leader?

Aim

The aim of Sustainability Management School (SUMAS) is to educate managers who will take responsible decisions in this complex business world. Its purpose is to deliver an innovative academic mix of sound business knowledge and a deep understanding of sustainability management applied to specific industries.

Vision

SUMAS's strong focus on excellence delivers high academic standards for students, offering both theoretical knowledge and best sustainable management practices. We continuously strive to provide the most advanced and intellectually challenging academic programs to produce highly qualified leaders for the future.

Values

- · Academic Rigor
- · Integrity
- · Respect for the Environment
- · Sustainable Living
- · Celebration of Diversity in all Spheres of Human Life

Switzerland Campus

Sustainability Management School Headquarters

Our offices are located at the Swiss Conservation Center, within the WWF Headquarters in Gland, Switzerland. This provides the perfect environment to study sustainability-related subjects in a unique background combining networking with industry experts and practical in-class knowledge. The state-of-the-art complex sets a benchmark in sustainable construction and was the first in Europe to receive LEED Platinum certification.

Sustainability Management School Learning Centre

Our new learning center is located directly across the Swiss Conservation Center. This brand new facility includes fully-furnished on-campus accommodation, a lecture hall and different seminar classrooms with state-of-the-art technology, gym, student lounge and a café bistro.

Student Life in Switzerland

Switzerland is well-known for being one of the most sustainable countries in the world, where students can experience a unique and balanced lifestyle while learning from the Swiss cultural diversity. Students attending programs in our Gland Campus can participate in festivals, events and local markets in the area. Moreover, our campus is located within a 10-minute walk from La Plage de Gland, where students can take a swim in the Lake Léman or enjoy the side parks, cafés and restaurants in the area.

In addition, the ideal location of Switzerland allows students to explore, discover and embark in new adventures in the neighbouring European countries, making their stay in SUMAS full of opportunities for personal and professional growth.

The strategic location of our campus allows students to reach major cities such as Geneva and Lausanne, Olympic capital, in under 30 minutes. The exceptional public transportation network of Switzerland makes activities such as skiing or hiking easily reachable for all students in the area, enabling them to disconnect from their daily grind during the weekends.

Italy Campus

Our new campus in BASE Milano is in the heart of the fashion, art and design district of Milan. Being located there gives our students the opportunity to work on real-life projects related to sustainable fashion, art and design at the fashion laboratory and work with industry partners such as Moleskine, Patagonia, Patek Philippe and many more. It is equipped with a student lounge, recreational facilities and a café bistro.

Student Life in Milan

Milan is the perfect city for students who want to enjoy not only the delicious food, but also the lively nightlife. Our campus is very close to the "Navigli" district, the center of Milan's nightlife. With its great bars and restaurants, framed by the Naviglio Grande and the Naviglio Pavese canals, this neighborhood is the place to be to have fun and meet the locals or other international students. It is also a great place for the art lovers, who will find many galleries along the canals and will get to explore the collections of local artists

Italy's capital of fashion is one of the country's most multicultural and diverse cities, with a stimulating rhythm that never gets too stressful. Milan's vibrant scene is not only a hub for fashion but for finance, research, media and the arts. Being a hub for so many industries also gives local and international students access to incredible training, internship and job opportunities.

Doctorate of Business Administration (DBA) in Sustainability Management [On-Campus and Online]

Designed to enhance professional practice through conducting an original piece of research that generates new, actionable knowledge within the context of practice.

The main focus of your thesis will be the innovative integration of business knowledge with sustainable development issues. Specifically, economic growth, environmental management and social fairness are integral parts of all DBA thesis.

The theoretical philosophy of this DBA program hinges upon a holistic approach to problem-solving and stresses the development of leadership skills in times of changing organizational settings due to crisis and scarcity of resources.

It places emphasis on the application of sound theory and rigorous research into real and complex issues in business and management. The students are expected to undertake an independent and systematic investigation selecting the appropriate methodology of research, methods and techniques. The aim is to address topics relevant to organizations and management, particularly with an emphasis on sustainability.
